大きさの錯視に関する心理実験－エンメルトの法則の検証－

A Psychological Experiment on the Size Illusion－A Verification of the Emmert's Law－

林川 美由樹（長崎大学経済学部）

Miyuki Hayashikawa (Faculty of Economics, Nagasaki University)

### **Abstract**

This paper tries to verify the Emmert's law that explains about a visual mechanism of retinal images and physical distance. The size of after-images that humans actually perceive will change in proportion to that the distance between an observer and the point of after-image. That is the Emmert's law.
